Overview

Do I need a power outlet in Costa Rica?

The two most important things to note with the power outlets in Costa Rica is that they are Type A and B. If you come from a country that uses these plug types, you will not need an adapter.

What are the different types of power plugs in Costa Rica?

In Costa Rica, there are two types of power plugs and outlets: Type A and Type B. Both types are used in airports, hotels, restaurants, etc., but they differ in terms of shape. Type A: Type A plugs have two flat prongs on either side of the plug.

What types of outlets are available in Costa Rica?

Costa Rica outlets are plug types A and B. Devices with electric Plug A can fit in both Plug A and Plug B. Devices with Plug B can ONLY fit into Plug B electrical outlets. Note: Some places we stayed in Costa Rica only had Plug A power outlets. In that case, our Plug B devices would have required an adapter.

Does Costa Rica have a plug a?

Many places off the beaten path in Costa Rica only have Plug A. We encountered this when staying in Uvita, Dominical and Monteverde, Costa Rica. [Click here](#) for a universal travel adapter that works in over 150 countries. But wait, you also need to look closely at the voltage. Voltage converters and plug adapters are NOT the same thing.

Do I need a travel adapter in Costa Rica?

The electrical outlets and power plugs in Costa Rica are of types A & B (see images). If your country uses the same electrical outlets and power plugs, you don't need a travel adapter. However, you may still need a voltage converter if the voltage is different.

Which plugs fit in a type B socket in Costa Rica?

Plugs of type A will also fit into a type B socket. If you're not sure whether the outlets and plugs used in your country are the same as in Costa Rica, you can use the tool at the top of this page to check if you need a travel adapter. All power sockets in Costa Rica provide a standard voltage of 120V with a standard frequency of 60Hz.
