

SolarInvert Energy Solutions

Croatia export photovoltaic module requirements

LFP 12V 200Ah

Overview

How much energy does Croatia import?

Croatia imports about 54.54% of the total energy consumed annually: 74.48% of natural gas, 78.34% of oil and petroleum products, and 100% of its solid fossil fuel needs. Croatia also co-owns the Krsko nuclear reactor in Slovenia, which is included in its energy mix as imported electricity.

How much solar power does Croatia have in 2023?

Croatia's Renewable Energy Sources Association announced that Croatia grew its installed solar plant capacity from 224 MW to 305.8 MW in the first six months of 2023 alone.

Does Croatia have a nuclear reactor?

Croatia also co-owns the Krsko nuclear reactor in Slovenia, which is included in its energy mix as imported electricity. In order to become energy-independent and sustainable, Croatia counts on its abundant renewable energy resources.

How can Croatia become energy-independent and sustainable?

In order to become energy-independent and sustainable, Croatia counts on its abundant renewable energy resources. In February 2020, the Croatian government adopted a new Energy Strategy for the period until 2030, with an outlook through 2050.

Is Croatia a good place for solar energy?

According to U.S. consulting firm BCG, Croatia has significant untapped potential for solar energy usage with one of the highest levels of solar radiation in Europe (3.4-5.2 kWh/m²day), but one of the lowest levels of installed photovoltaic capacity per capita (15.6 Wp).

Does Croatia have geothermal power?

Croatia also has high potential in geothermal power, with six active exploration projects for electricity and heating plants in central and eastern Croatia. These regions, located in central Europe's Pannonian basin, have an average geothermal gradient 60% higher than the European average.
