

## **SolarInvert Energy Solutions**

# **Cylindrical lithium battery automatic charging equipment**

## Overview

---

What is a cylindrical lithium-ion battery?

A cylindrical lithium-ion battery is a type of lithium-ion battery with a cylindrical shape using a metal can as its packaging material.

What are the different types of lithium-ion battery cells?

Among the various types of lithium-ion battery cells, LCO (Lithium Cobalt Oxide), NMC (Nickel Manganese Cobalt), and LFP (Lithium Iron Phosphate) are some of the most commonly used chemistries, each offering unique advantages and trade-offs in terms of structure, performance, cost, and manufacturing requirements.

What are lithium-ion batteries used for?

In the rapidly evolving world of energy storage, lithium-ion batteries have become the dominant choice for applications ranging from electric vehicles (EVs) to portable electronics.

What is czb5c series Charger?

The CZB5C series charger organically combines magnetic leakage transformer, silicon controlled rectifier technology and microcomputer control technology to achieve optimized Wsa+Pulse charging characteristics. The CZC7 series automatic charger has two models: CZC7 with fixed charging parameters and CZC7A with adjustable charging parameters.

Are Chargers & dischargers qualified export products?

Chargers and dischargers have been confirmed as qualified export products by the national commodity inspection department and exported to more than a dozen countries and regions such as Europe, America, Australia, and Southeast Asia. A self-built warehouse with sufficient inventory of conventional parts further shortens the customization cycle.
