Czech home solar power generation system

Overview

How many solar power plants are there in the Czech Republic?

At the end of 2021, there were over 50,000 photovoltaic power plants with an installed capacity of about 2200 MWp in the Czech Republic. There were 500 solar parks with a capacity of over 1 MWp. During 2022, the number of installations rose to almost 85,000 PV plants with a total capacity of 2,460 MWp.

How will Czechia support solar projects in 2024?

The aid will take form of direct grants which will cover up to 50% of the investment cost of supported projects. Czechia installed 967 MW of solar in 2024, driven by residential and commercial and industrial (C&I) projects, which accounted for 930 MW of the total, says the Czech Solar Association (Solární Asociace).

Why did Czechia increase funding for C&I solar & storage projects?

Czechia has increased funding for its interest-free loan program for commercial and industrial (C&I) solar and storage projects to CZK 3 billion (\$132.2 million) after strong demand exhausted the previous budget. The aid will take form of direct grants which will cover up to 50% of the investment cost of supported projects.
