# Distribution breaker in China in Laos

## Overview

---

Will new 500 kV and 230kV transmission lines help Laos?

VIENTIANE, April 22 (Xinhua) — The new 500 kV and 230 kV transmission lines to be installed in Laos' capital Vientiane, a joint project between Lao and Chinese companies, will ensure more Lao people to have sufficient power, officials here have said.

How will Vientiane's Electricity Project Impact Laos?

The project will create a sustainable electricity supply for the development of Lao capital Vientiane and increase the capacity of Laos' electricity grid," said Yu Jun, general manager of the China Electric Power Equipment and Technology Co., Ltd., the Chinese EPC contractor.

Will Vientiane's new power lines provide electricity to other countries?

The new power lines will transmit electricity from hydropower dams for use in Vientiane as well as for sale to other countries, local daily Vientiane Times reported on Monday, quoting managing director of the Lao state-run Electricite du Laos (EDL) Bounoum Syvanpheng as saying.
