

**SolarInvert Energy Solutions**

# **Do UPS and battery cabinets need to be separated**

## Overview

---

Do battery cabinets need to be in a battery room?

Because cabinets can have locked doors, the cabinets do not have to be in battery rooms; they can be installed directly adjacent to the UPS system and/or the information technology equipment. This eliminates the need for long dc cabling. Battery cabinets can be made to be indistinguishable from IT equipment cabinets.

Do I need a separate room for the battery-pack?

If you do not need to use a separate room for the battery-pack, consider placing them in a room where the H<sub>2</sub> concentration can never reach dangerous levels (circulated air, consult your ventilation and fire safety engineers). My advice is free of charge and of respective quality.

Can VRLA cabinets be installed in a battery room?

Battery cabinets - Only VRLA can be installed in cabinets. Because cabinets can have locked doors, the cabinets do not have to be in battery rooms; they can be installed directly adjacent to the UPS system and/or the information technology equipment. This eliminates the need for long dc cabling.

Should batteries be in a separate room?

Battery rooms are considered hazardous (classified). So you'll need provisions for class I div II at minimum. read over article 500-504. If it is broken, fix it. If it isn't broken, I'll soon fix that. I don't believe there is an NEC requirement that batteries be in a separate room.

Does the size of ups differ between internal and external batteries?

Note#2: dimension of UPS can differ between the one with internal batteries and the one with external batteries. But the dimensions will not differ for the ones with internal batteries even if the number of internal battery strings changes as shown in below table-2. UPS output disconnecting device.

What are the different types of UPS batteries?

**Battery types** In our introductory unit we pointed out that lead-acid batteries are the preferred method of energy storage for UPS systems in about 95% of all data center applications. We also stated that lead-acid batteries can be split into two main categories or technology types: valve-regulated or vented.
