Double glass component fixing

Overview

What is point fixing glass curtain wall?

The panel glass may apply single glass, insulated glass, laminated glass and so on, which go through toughening treatment. Point fixing glass curtain wall can be divided into two styles, one is hole point fixing and the other is clamp point fixing according to the forms of glass supporting devices.

How to fix a glass panel to a spider?

ch are installed in all the holes belonging to the glass panel to be fixed to the spiders. For bolted facades with drilled connection, the threaded body, the articulated bolt and first contact washer are placed in the hole in the glass panel from the o.

What is a single cable net fixing system?

The single cable net fixing system is pre-stressed, non-geometrically linear and flexible structure. By loading certain pre-stress on the double direction steel cables, the cable net can resist the external loading. The system consists of horizontal and vertical steel cable, cable clamp, and glass supporting device.

Why is a metallic fitting used in laminated glass?

ith structural properties, which allow this new connection to the glass (e.g. SentryGlas). The incorporation of the metallic fitting in the laminated glass improves the transmission and distribution of applied loads between the two panels of laminated glass, providing a significant increase.

Are glass plies a “plate” or “beam” element?

To improve the reliability of the analyses, no simplifying assumptions have been made regarding the structural response of glass plies and spacers as “plate” and “beam” elements, respectively (i.e., no plate or beam theory have been used in the numerical simulations).
