

## SolarInvert Energy Solutions

# EK inverter 15kw

## Overview

---

What is a 15kW transformerless grid tie inverter?

15kW transformerless grid tie inverter for three phase on grid solar power system, which converts 200-820V wide DC input voltage to 208V/ 240V/ 380V AC output voltage feed the power into the grid. Grid tied pv inverter with LCD, can set main general parameters. The current THD at rated power and in the sine wave is  $\leq 3.5\%$ .

What is a goodwe et 15-30kw inverter?

GoodWe ET 15-30kW Series inverter is ideal for large residential or small commercial and industrial applications. As the core of the energy storage solution, the high-voltage inverters facilitate powerful energy backup and load management for optimized autonomy and reduced energy cost.

What is a 15kW variable frequency drive inverter?

15kw variable frequency drive inverter, 20 hp 3 phase inverter with RS485 communication mode. Comes with cooling fans and IP 20 strong impact resistance, and the 3 phase variable frequency inverter works at (-10°C, 40°C). An Interior PID controller is convenient for making a closed-loop system.

What is a low frequency 50hz/60hz solar inverter?

Low frequency 50Hz/60Hz on grid tie solar inverter with 15kW power, wide input voltage range and high efficient MPPT more than 99%, high reliability due to perfect protection function, can power all kinds of appliances in home or office environment including motor-type appliances such as tube light, fan, refrigerator and air conditioner.

Why do solar inverters use DC input configurations?

DC input configurations enable easier implementation of maximum power point tracking (MPPT) algorithms, optimizing energy harvesting from solar

arrays. It improves reliability and longevity by reducing heat generation and stress on components, leading to a more durable system of grid tie inverter.

Why should you choose a high-voltage inverter?

As the core of the energy storage solution, the high-voltage inverters facilitate powerful energy backup and load management for optimized autonomy and reduced energy cost. The ET inverters also present peak shaving that balances power demand and grid power imported, to effectively reduce extra grid demand.
