

SolarInvert Energy Solutions

EK inverter 25 kW price

Overview

How does a solar inverter work?

A 25kW three phase grid tie solar inverter works on a string scale. For example, if there are 30 solar panels in the array, they can be divided into 5 strings, meaning 6 solar panels per string. For each string, there will be a solar inverter, resulting in a solar system with multiple string inverters.

What are the advantages of MPPT inverter?

A 25kW Three Phase Grid Tie Solar Inverter with an MPPT inverter offers advanced MPPT tracking technology and a wide MPPT voltage range. Its no isolation transformer H6 full-bridge configuration results in a highest efficiency of up to 97%. It also provides over voltage, short circuit, overload, and overheating protection, as well as anti-islanding protection. Multiple inverters can be operated in parallel. The LCD display enables users to conveniently monitor main parameters.

Does pure sine wave inverter have a battery?

Off Grid System with Pure Sine Wave Inverter (No Battery) Please complete the fields below to send your friend a link to this product. Your friend will receive an email from you with a link to our site. Input DC Voltage?

AC Output Voltage?
