EU Solar Air Conditioning

Overview

What is SACE (solar air conditioning in Europe)?

The SACE (Solar Air Conditioning in Europe) project was initiated in early 2002 and conducted over the next 2 years by a group of researchers from five countries, supported by the European Commission.

Does solar air conditioning save energy?

Conclusions Solar air conditioning has a strong potential for significant primary energy savings. In particular, for southern European and Mediterranean areas, solar assisted cooling systems can lead to primary energy savings in the range of 40–50%. Related cost of saved primary energy lies at about 0.07 €/kW h for the most promising conditions.

Are solar air conditioning systems a future option?

Such systems might be a future option particularly for sunny climates such as in the Mediterranean zone. Hans-Martin Henning (Ed.), Solar-Assisted Air-Conditioning in Buildings, A Handbook for Planners, Springer, Wien, New York, ISBN 3-211-00647-8.

What is solar cooling?

ermal energy.EXAMPLES OF APPLICATIONSSolar cooling is suitable for residential, commercial, institutional and industrial use. The solar cooling supply is equal to the demand: when the sun is at its hottest solar irradiation is high, the maximum energy is available and the demand is also high. A typical solar cooling system also provides space.

Are solar cooling systems economically feasible?

Tsoutsos et al. present a study of the economic feasibility of solar cooling technologies. Karagiorgas et al. investigated the application of renewable technologies in the European tourism industry and identified a large number of solar thermal systems but only a few solar cooling systems.

What do you know about solar assisted air conditioning of buildings?

General experiences with installed plants In Task 25 “Solar Assisted Air Conditioning of Buildings”, a project that has been carried out in the framework of the Solar Heating & Cooling Programme of the International Energy Agency (IEA) 11 plants in six countries were monitored. Some important experiences and hints regarding control are:
