

SolarInvert Energy Solutions

East Timor photovoltaic panels

Overview

What is a photovoltaic project in Timor-Leste?

Just as the remaining renewable energies sources that are being explored by the Government in Timor-Leste, the photovoltaic units (or solar project) implementation project is specially directed for the families that live in remote areas, where difficulties still exist in the national energy network installation.

Who bids for solar IPP project in Timor-Leste?

For Timor-Leste, bidders are typically from legacy countries such as Indonesia, Portugal and People's Republic of China. For the Solar IPP project, Government of Timor-Leste represented by the Ministry of Finance has provided backstop guarantee for EDTL obligations under the Implementation Agreement.

When were solar panels installed in DLI?

The first solar panels were installed in 2008. Nowadays, in all the districts, with the exception of Díli, there are sucos with solar panels, where two thousand, one hundred and forty three families are covered in the whole territory.

How many solar panels are there in DLI?

Nowadays, in all the districts, with the exception of Díli, there are sucos with solar panels, where two thousand, one hundred and forty three families are covered in the whole territory. For the acquisition of this source of energy, the process is identical to the one that applies to the remaining projects.

Does Timor-Leste provide backstop guarantee for EDTL obligations?

For the Solar IPP project, Government of Timor-Leste represented by the Ministry of Finance has provided backstop guarantee for EDTL obligations under the Implementation Agreement. Special Investment Agreement, if concluded could allow the winning bidder a leasing of the Site at a concessional rate and other benefits.
