Overview

How will battery storage work in Spain?

Following its launch in Italy last year, the business will deploy battery storage in Spain, driving progress towards the country's 2030 clean power target and deployment goals for renewable energy. Batteries create a reliable, greener and more flexible grid which will improve energy security and enable the transition to net zero.

Why should Spain invest in batteries?

Batteries create a reliable, greener and more flexible grid which will improve energy security and enable the transition to net zero. With ambitious targets, Spain is rapidly deploying renewable energy to decarbonise its grid and expects to increase clean energy generation to 81% by 2030.

Why do we need energy storage systems in Spain?

Energy storage systems in Spain are a key element in the fight against climate change, as they help us to address the challenge of the energy transition. These systems make renewable energy production more flexible; and therefore help us to guarantee its integration into the Spanish electricity system.

Is battery storage a niche for investors in Spain?

This expansion comes as Field has surpassed 4.5 GWh of projects in advanced stages of development across Europe. Battery storage has become an interesting niche for investors in Spain, which aims to cover 81% of its electricity needs with renewable energy by the end of this decade.

What is Spain's energy storage program?

For stakeholders in battery storage, thermal storage, and pumped hydro, this program offers not only financial backing but also long-term stability and political support. Spain has launched a €700 million energy storage program

to support battery, thermal, and pumped hydro projects, aiming to deploy 2.5–3.5 GW of capacity.

Why should you invest in Toni battery storage in Spain?

Amit Gudka, CEO, Field: “Toni brings deep expertise to our operations in Spain, an important market as we expand across Europe and work to achieve a net zero future. Without battery storage, renewable energy cannot scale at the pace the world needs to decarbonise.
