

## SolarInvert Energy Solutions

# Energy storage battery container bidding price

## Overview

---

How much does a battery energy storage system cost in China?

The procurement exercise has attracted 67 battery energy storage companies but only six have emerged as winners. The average bid stood at CNY 0.473/Wh (\$65/kWh). Public procurements in China continue to demonstrate exceptionally low price levels for lithium-ion phosphate (LFP) battery energy storage systems (BESS).

How much does a lithium-ion phosphate battery cost in China?

Public procurements in China continue to demonstrate exceptionally low price levels for lithium-ion phosphate (LFP) battery energy storage systems (BESS). In the latest tender, more than 80% of bidders quoted prices below CNY 0.5/Wh (\$69/kWh), highlighting the fierce competition in the world's biggest BESS market.

How much does a Chinese company bid?

The average bid of the first six candidates was 0.4730 yuan/Wh, while the bids of the three alternative companies were somewhat higher and stood at 0.4738 yuan/Wh, 0.486 yuan/Wh and 0.4784 yuan/Wh. The latest results follow in the footsteps of recent procurements which saw similarly low prices.

Which approach reflects the influence of large-scale batteries on the market?

On the other hand, the price-maker approach better reflects the influence of large-scale batteries on the market, both technically and economically , , , , , , , , .

How does reconnection of demand Block 1 affect energy prices?

The energy price increases from 22:00 to 24:00 as result of the reconnection of demand block 1 at hour 22:00, enabled by the semi-elastic load modeling approach. The reduction in the load of demand block 1 allows its reconnection while respecting the transmission network's thermal limits.
