

## SolarInvert Energy Solutions

# Energy storage cabinet cooling system price solution

## Overview

---

Why should you buy a specialized enclosure air conditioner from Kooltronic?

A specialized enclosure air conditioner from Kooltronic can help extend the lifespan of battery energy storage systems and improve the efficiency and reliability of associated electronic components. Without thermal management, batteries and other energy storage system components may overheat and eventually malfunction.

What is a battery energy storage system?

Battery energy storage systems (BESS) ensure a steady supply of lower-cost power for commercial and residential needs, decrease our collective dependency on fossil fuels, and reduce carbon emissions for a cleaner environment.

Can a battery energy storage system fit a closed-loop air conditioner?

A leading manufacturer of battery energy storage systems contacted Kooltronic for a thermal management solution to fit its rechargeable power system. Working collaboratively with the manufacturer, Kooltronic engineers modified a closed-loop air conditioner to fit the enclosure, cool the battery compartment, and maximize system reliability.

What are the benefits of ESS with outdoor cabinet design?

Highly integrated ESS with outdoors cabinet design provides high protection classAdvanced integration technology ensures optimal system performance with lower cost SAFE AND RELABLE DC electric circuit safety management includes fast-breaking and anti-arc protectionMulti-state monitoring and linkage actions ensure battery system safety.

Why should a Bess enclosure be heated & cooled?

Like most heat-sensitive electrical equipment, operation within hot and cold temperatures can, over time, reduce power output and longevity. Even the

batteries themselves generate heat when charged and discharged, so active cooling and heating should be introduced to BESS enclosures to maintain an ideal temperature range.

## The whole range of thermal management for the BESS industry

Efficient  
Higher Revenue

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150kW Peak Output Power
- 2 MPPT Trackers, 150% DC Input Oversizing
- Max. PV Input Current 16A, Compatible with High-Power Modules

Intelligent  
Simple O&M

- IP66 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

Flexible  
Abundant Configuration

- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead-Acid and Lithium Batteries
- Max. 6 Units Inverters Parallel
- AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation
