# **Energy storage container goes online**

## Overview

---

What is a compressed air energy storage project?

A compressed air energy storage (CAES) project in Hubei, China, has come online, with 300MW/1,500MWh of capacity. The 5-hour duration project, called Hubei Yingchang, was built in two years with a total investment of CNY1.95 billion (US\$270 million) and uses abandoned salt mines in the Yingcheng area of Hubei, China's sixth-most populous province.

Where do you store solar energy?

China leads the world in terms of renewable energy resources like solar power. And not just by a small margin either, making over twice as much solar power as the next highest country, the USA. Where do you store any excess solar energy for use when the sun isn't shining?

Answer: in ridiculously big batteries.

How much does an energy storage system weigh?

All in, the system weighs about 55 tons (50 tonnes) To put it into simple terms, at 1,500 volts DC, it could theoretically power an average US home at 1 kW continuously for about 640 hours – a few hours shy of 27 days. Not that this energy storage system is designed for such a thing.

What makes Tener a great energy storage system?

CATL's cutting-edge cell technology underpins the system's outstanding performance. TENER is equipped with long-lasting, zero-degradation cells tailored for energy storage applications, achieving an impressive energy density of 430 Wh/L, a significant milestone for LFP batteries used in energy storage.

Is Tener a zero-degradable energy storage system?

On April 9th, CATL revealed TENER, the world's inaugural mass-producible

energy storage system boasting zero degradation within its initial five years of operation, in Beijing, China.

Will Envision Energy's 8 MWh battery fit in a 20 ft 6 m shipping container?

Envision Energy announced an 8-MWh, grid-scale battery that fits in a 20-ft (6-m) shipping container this week while at the third Electrical Energy Storage Alliance (EESA) exhibition held in Shanghai. Taken from Envision Energy's website, this is a possible design configuration of its 8-MWh, 20-ft (6-m) container battery. It's colossal.

## Energy storage container goes online

### Roundup: First ever 'blackstart' battery, Li

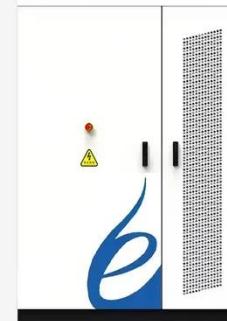

Jan 28, 2016 · First ever 'blackstart' energy storage system to go online in Germany 27 January 2016: A 5MW grid-scale battery park in Germany will be the first to utilise energy storage for ...
