

## SolarInvert Energy Solutions

# Energy storage container sales system in poor countries

## Overview

---

Which countries have high potential for energy storage?

A notable market with high potential for energy storage in the region is Jordan, where a leading project developer, AES Energy Storage, is currently developing a 20 MW lithium ion ESS.

What is the market for energy storage in South Asia?

The market for energy storage in the South Asia region is dominated by India. (See Chart 3.4). In India, several key factors are driving the market for energy storage, perhaps most notably the ambitious National Solar Mission.

What will the energy storage industry look like in East Asia & Pacific?

Additionally, in many of these areas the industry is likely to adopt a more distributed approach to grid development, using more local power generation and microgrid systems. We expect that the largest energy storage market in the East Asia & Pacific region will be China.

Do emerging economies need energy storage?

While the costs for renewable generation continue to fall, integrating and effectively using these new resources, especially in regions with weak grid infrastructure, will require energy storage. Furthermore emerging economies must bring reliable electricity service to about 1.2 billion people who currently lack access.

How many energy storage projects are there in Sub-Saharan Africa?

There are two flywheel energy storage projects totaling 10 MW under development by Temporal Power, along with an underwater compressed air energy storage system from Hydrostor, and numerous smaller battery projects. A number of challenges have resulted in limited energy storage market activity in Sub-Saharan Africa to date.

Which countries are deploying thermal energy storage in the Middle East?

There are also a number of CSP projects that include thermal energy storage installed in Morocco and the United Arab Emirates. While to date there have been limited energy storage deployments in the Middle East, nations in the region are working to exploit their significant renewable energy resources.
