# Energy storage electrical promotion plan

## Overview

---

Can energy storage technology be promoted under incentive policies?

In a certain sense, this study reveals the research on the promotion mechanism of energy storage technology under incentive policies and provides a certain reference basis for local governments to formulate and improve energy storage policies.

How a government can promote energy storage technology?

Energy storage technology is the key technology to promote the consumption of renewable energy. The government can promote the energy storage technology through the incentive policy of energy storage industry.

Are energy storage projects a demonstration project?

In combination with the actual development of energy storage industry, most energy storage projects are demonstration projects at present, and many energy enterprises are still in a wait, so they have little enthusiasm to configure energy storage devices. In this case, is taken as the example.

Can evolutionary game models guide energy storage system subsidy policies?

Chen et al proposed an evolutionary game model combined with real options to guide energy storage system subsidy policies for microgrid by applying to a small electricity network served by a regulated utility, but the evolutionary game analysis only considered subsidy policy.
