

## SolarInvert Energy Solutions

# Energy storage equipment costs in Ireland

## Overview

---

On average, the initial upfront cost of a battery storage system (including the installation) is around €5,000 to €15,000. Can energy storage save money in Ireland?

By contributing to security of supply, helping to support renewable capacity, and displacing fossil fuels in the balancing market, energy storage can deliver a net saving to end consumers in Ireland of up to €85m per year.

Are home battery storage systems a good idea in Ireland?

In Ireland, demand for home battery storage systems — even without solar panels — is growing rapidly as homeowners look to reduce costs and gain energy independence.

What is energy storage Ireland?

Energy Storage Ireland is a newly established representative body composed of industry members who are active in the development of the energy storage market in Ireland.

Can energy storage be deployed in Ireland?

Appropriate and timely regulatory and market design is therefore essential to allow the deployment of energy storage in Ireland at the scale required to achieve current environmental policy objectives. However, the current policy framework is unsuitable to deliver the volumes and types of energy storage we will require.

What is energy storage Ireland (ESI)?

Energy Storage Ireland (ESI) is a representative body for those interested and active in the development of energy storage in Ireland and Northern Ireland.

What are energy storage technologies?

Informing the viable application of electricity storage technologies, including batteries and pumped hydro storage, with the latest data and analysis on costs and performance. Energy storage technologies, store energy either as electricity or heat/cold, so it can be used at a later time.
