

## SolarInvert Energy Solutions

# Energy storage project investment cooperation

## Overview

---

This paper proposes an option game model that is applicable to multi-agent cooperation investment in energy storage projects. A power grid enterprise and power generation enterprise are assumed to act.

What is an energy storage project?

An energy storage project is a cluster of battery banks (or modules) that are connected to the electrical grid. These battery banks are roughly the same size as a shipping container. These are also called Battery Energy Storage Systems (BESS), or grid-scale/utility-scale energy storage or battery storage systems.

Are energy storage projects a project finance transaction?

In many ways, energy storage projects are no different than a typical project finance transaction. Project finance is an exercise in risk allocation. Financings will not close until all risks have been catalogued and covered. However, there are some unique features to energy storage with which investors and lenders will have to become familiar.

Will EDF and CEIC jointly build a smart energy island?

EDF and CEIC want to jointly construct an “offshore comprehensive smart energy island demonstration project” off the Dongtai region of Jiangsu Province. This would include a “coordinated integration of hydrogen storage and green energy”, said CEIC.

How has China's Dual carbon goal impacted energy storage?

BEIJING, July 1 -- China's dual carbon goal and targeted policies have provided strong tailwinds, enabling the country's energy storage businesses to thrive amid the rapidly evolving market competition.

How will China's green energy project benefit global enterprises?

The project will be a model for international energy cooperation, attracting more global enterprises to participate in China's green energy transition, and

sharing Chinese development opportunities, Wang Peng, an associate research fellow at the Beijing Academy of Social Sciences, told the Global Times on Friday.

Does Tesla have a grid-side energy storage project in China?

US electric car maker Tesla signed an agreement on Friday for its first grid-side energy storage project in the Chinese mainland, according to a statement the company sent to the Global Times on Friday.
