Ethiopia Communications jointly builds and shares 5G base stations

Overview

Ethiopia's government-owned operator Ethio Telecom (ET) has launched a 5G mobile phone service in the capital Addis Ababa. With temporary spectrum approval.

According to Reuters, new entrants to the market have stimulated greater competitive activity and galvanised the national carrier into action. ET is facing competition.

Speaking at the launch event Ethio Telecom CEO Frehiwot Tamru said: "The 5G service is [to be] launched in selected places in Addis Ababa." In the coming 12.

In June 2021 the Ethiopian government launched a tendering process to sell off a 40% stake in Ethio Telecom to private investors. In March 2022, the government.

With a population of 110 million Ethiopia has much potential as a developing economy but it sold only one of two full-service recon licences on offer in May.

What is Ethio Telecom?

ETHIO TELECOM LAUNCHES ITS PRE-COMMERCIAL 5G SERVICE! Ethio telecom has been a pioneer telecom service provider in Africa. We have been introducing latest technologies to support socio economic development of Ethiopia from the establishment to date, playing enabling role in the overall development of the nation in all-weather.

Is 5G spectrum approved in Ethiopia?

The Ethiopian Communication Authority has furnished us with temporary 5G Spectrum approval to implement the pre-commercial trial of the service while our Strategic Partner Huawei technologies has deployed the 5G network.

Why is 5G deployed in Addis Ababa?

Our pre-commercial deployment of the 5G service in Addis Ababa, as the

capital city of our country and the diplomatic seat of international and continental institutions is in line with our aspiration to become a preferred operator as well as with our 3 years' growth strategy and technology roadmap.

What is the fifth generation network?

The fifth generation network (5G) characterized by the fastest speed (up to 10 Gbs), low latency (less than 1 ms) and massive communication capability (up to 1 Million connections within 1 km²), can unlock blazing fast speeds in more places, real-time responses and massive connectivity.
