

SolarInvert Energy Solutions

Fiji Wetland Photovoltaic Solar System

Overview

Does Fiji have a solar PV system?

Solar photovoltaic (solar PV) systems are gaining popularity globally and likewise for Fiji. Globally, the price of solar PV has dramatically decreased over the last decade, resulting in an increase in new solar PV installation for electricity generation. Fiji's solar PV generation on grid was nil before 2010.

How will Fiji develop a solar agrophotovoltaic (APV) system?

It will do this by financing a 4 MW solar agrophotovoltaic (APV) system and 5MW battery energy storage system (BESS) in Ovalau, Fiji's sixth largest island. It will develop solar power generation simultaneously with battery storage and, as a co-benefit, boost local agricultural production.

How many MW solar power plant in Fiji?

EFL has planned for 5 MW solar power plant in Nadi, Fiji. This would require approximately 33,000 m² of land area and using Eq. 8.1, its generation potential is estimated to be around 9 GWh/annum. However, for diversifying Fiji's electricity supply sources, further capacity addition is needed for solar PV supported by wind and biomass.

How many solar panels are installed in Fiji?

In total, around 4 MW of solar PV is installed with some grid-connected solar systems planned and many off-grid solar system planned by Fiji Department of Energy with funding from Fijian government and overseas donor agencies.

How much does solar PV cost in Fiji?

Solar PV has many advantages such as it has no moving parts and therefore does not require extensive operation and maintenance; solar resource is free and abundant at most locations in Fiji. For Fiji, the current installation cost of rooftop solar PV grid connected system is around 3100–3500 FJD/kW.

Where can land based solar installations be done in Fiji?

Hence, considering the large land area in Viti Levu and Vanua Levu, land based solar installations can be done near locations with demand depending on the solar resource and land availability for installations. Photovoltaic power potential in Fiji. (Source: WBG 2016)
