Gaborone 100-megawatt energy storage project

Overview

Will Botswana build a 100-megawatt solar plant?

Botswana has awarded a \$78.3 million contract to build a 100-megawatt solar plant to a consortium led by China Harbour Engineering Co. The project which is Botswana's second utility-scale solar facility is set to be completed in the second quarter of 2026.

Can China build a 100 MW solar plant in Botswana?

A group of Chinese companies led by China Harbour Engineering Co has won a contract to build a 100 MW solar plant in Botswana, the country's second utility-scale renewables facility.

How much does a solar plant cost in Gaborone?

The solar plant, valued at US\$78.3 million (R1.4 billion), is set to be completed by the second quarter of 2026, according to Zhitong Finance. The contract signing took place on Monday in Jwaneng, which is a diamond mining town located 200 kilometers west of the capital, Gaborone.

How much does Botswana's solar project cost?

The project is a key development in Botswana's renewable energy sector, marking the country's second utility-scale solar facility. The contract which is valued at \$78.3 million includes partnerships with China Water and Electric Development Co. and local investors.

Where is Scatec ASA building a solar power plant in Botswana?

In March, Scatec ASA began construction of a 100-megawatt solar power plant in Botswana's northeast. The initial 60 megawatts of this project are expected to come online by the end of this year. The Ministry of Minerals and Energy is also working on additional renewable energy projects.
