

## **SolarInvert Energy Solutions**

# **Gaborone Photovoltaic Energy Storage Project**

## Overview

---

What is the 80 MW Gaborone solar project?

The “80 MW Gaborone solar project” was a 5 year implementation project comprising the implementation of 7 solar PV projects and the construction of a local PV panel assembly factory. The services rendered for the “80 MW Gaborone solar project” here: .

How much does LCOE cost in Gaborone?

The levelized cost of energy (LCOE) of the projects will range between \$0.08 and \$0.10/kWh. The projects will be located in areas like Gaborone, Ramotswa, and Lobatse. The names of the other off-takers will be disclosed once the PPAs are signed.

Is Botswana a good country to invest in solar energy?

Botswana had the goal to achieve 25% renewables by 2030 and the need to increase installed generation capacity in the medium term and had also one of the best solar resources in the world and has currently generation units in its portfolio with running costs higher than the cost of solar energy, as is the case of the diesel Orapa unit.

Will solar power be sold to private off-takers?

“Currently, we have 30 MW in the pipeline of 25 to 35 individual grid-tied solar projects of about 400 kW, some being bigger and others slightly smaller,” Kofi Owusu Bempah, CEO of Pash Global, told pv magazine. “The idea is to sell power to private off-takers.

Who are Pash global & Tswana renewables?

Pash Global and Tswana Renewables have formed a joint venture to develop small-scale PV plants across Botswana. For the first two 400 kW projects they have already secured a power purchase agreement.
