

## SolarInvert Energy Solutions

# Generator power of super large power station

## Overview

---

The Three Gorges power station located in Yichang in Hubei province is by far the world's biggest power generation facility. The 22,500MW hydroelectric power plant built on the Yangtze River was commissioned in 2003 and built by 2012. The \$29bn mega power station is owned and.

The Xiluodu hydroelectric power plant on Jinsha Jiang River in central Sichuan Province is China's second biggest power station and the world's third biggest. The installed capacity of the power station reached 12,320MW as of June 2014 and is expected to reach.

At 6,300MW, the Longtan hydropower project located on the Hongshui River in Tian'e County in Guangxi Province is China's third biggest.

The Waigaoqiao Power Station located in the Pudong New Area of Shanghai is one of the four 5,000MW Chinese coal power plants ranking as the fifth biggest in the country. Shanghai.

The coal-fired Tuoketuo power station located in Togtoh County, Hohhot, Inner Mongolia, has a gross installed capacity of 5,400MW making it the biggest thermal power plant and the fourth biggest power generating facility in China. The power station is owned and.

What is the largest power generating facility ever built?

As of 2025, the largest power generating facility ever built is the Three Gorges Dam in China, completed in 2012. The facility generates power by utilizing 32 Francis turbines for a total capacity of 22,500 MW. The eight largest power stations are also hydroelectric dams, beginning with Baihetan Dam, at 16,000 MW, also in China.

What is the world's largest hydroelectric power station?

Three Gorges Dam in China, currently the world's largest hydroelectric power station, and the largest power-producing facility ever built, at 22,500 MW As of 2025, the largest power generating facility ever built is the Three Gorges Dam in China, completed in 2012.

How much power can a large power plant produce?

A single large power plant can generate enough electricity (about 2 gigawatts, 2,000 megawatts, or 2,000,000,000 watts) to supply a couple of hundred thousand homes, and that's the same amount of power you could make with about 1000 large wind turbines working flat out.

Which is the largest power plant in the world?

Here are some of the largest power plants. The dam is located in the areas of Xilingxia gorge, one of the three gorges of the river, which will control a drainage area of 1 million km<sup>2</sup>, with an average annual runoff of 451 billion m<sup>3</sup>. It is the world's largest electricity-generating plant of any kind.

What is the largest power station in the world?

At all times since the early 20th century, the largest power station in the world has been a hydroelectric power plant. More information Held record, Name of power station . More information Rank, Station . More information Rank, Station .

How many generators are there in a hydropower plant?

The hydropower station consists of a 181m tall and 2,335m long gravity dam and 32 turbine / generator units rated 700MW each, and two 50MW power generators. Six foreign groups including Alstom supplied equipment for the plant.
