

SolarInvert Energy Solutions

Ghana Group Energy Storage Power Generation Project

Overview

The project is to construct an up to 515MW power plant with a projected cost of \$1.2 billion at Kpone, in the Heavy Industrial Area of Ghana. What is the Ghana Energy Development and Access Project?

The Ghana Energy Development and Access Project (GEDAP) is a multi-donor funding project that supports Ghana in the electricity efficiency of the distribution system and the reduction of greenhouse gas emissions, as part of the SE4ALL Action Plan.

How will GPGC power the new power plant in Ghana?

GPGC will power the new power plant in Ghana using advanced upgraded power plants transported from Italy. These power plants will utilize General Electric Sprint Gas Turbines (LM6000PD and LM6000PF). Both turbines have recently been fully serviced by General Electric. Together, they will provide a total of 107mw additional capacity into Ghana's power grid.

Can GE make Ghana self-sufficient in electricity?

GE was awarded a contract to supply TM2500 gas turbine generator sets and GE's steam turbines in a combined-cycle configuration in May 2017. The Bridge Power project will help make Ghana self-sufficient in electricity by meeting both its near-term and long-term energy needs.

Will the bridge power project make Ghana self-sufficient in electricity?

The Bridge Power project will help make Ghana self-sufficient in electricity by meeting both its near-term and long-term energy needs. An estimated 62% of the electricity demand in the country is domestic while the remaining is commercial and industrial.

What role does GPGC play in Ghana?

GPGC has invested close to USD 100 million in Ghana to bring additional capacity to the country's power grid with the installation of the power plant

project. The company is fully committed to supporting Ghana's economic growth and is building long-term partnerships with integrity.

How much power will General Electric provide to Ghana's power grid?

General Electric's recently serviced plants will add a total of 107mw into Ghana's power grid.
