Overview

Greek power utility PPC SA (ATH:PPC) has announced the start of construction works on two battery energy storage systems (BESS) in Northern Greece with a combined capacity of 98 MW/196 MWh. Will Terna Energy build a pumped storage hydropower system in Greece?

Terna Energy is preparing to begin the construction of a pumped storage hydropower system in western Greece worth EUR 500 million. The Amfilochia unit will have a capacity of 680 MW in turbine mode and 730 MW for pumping.

What is hydro pumped storage in Amfilochia?

The project “Hydro Pumped Storage in Amfilochia” is the largest investment in energy storage in Greece. With a total installed capacity of 680 MW (production) and 730 MW (pumping), the project consists of two independent upper reservoirs (Aghios Georgios and Pyrgos) and a common lower reservoir, Kastraki Lake.

Who supplied electromechanical equipment for Amfilochia pumped storage complex?

The Greek company TERNA S.A., construction branch of GEKTERNA Group, awarded the international technology group ANDRITZ a contract for the supply of electromechanical equipment for the new Amfilochia Pumped Storage Complex in the Central Greece region.

What is Terna Energy's Amfilochia project?

According to Terna Energy, its licensed pumped storage projects in the Balkan country, including Amfilochia, will have a combined capacity of 1.5 GW. One of them is planned to be implemented at the Potamoi dam in Crete. The company said Amari is the largest hybrid power project in Europe.

What is the capacity of Amfilochia hydropower plant?

The Amfilochia unit will have a capacity of 680 MW in turbine mode and 730 MW for pumping. Hydroelectric Projects Director of Terna Energy Yioula Tsiknakou has announced at IENE's conference that the Greek company reached a final investment decision for its pumped storage hydropower plant in the northwestern part of Aetolia-Acarnania.

Will a pumped storage plant be a green battery?

The advanced pumped storage plant will act as a green battery by balancing fluctuations in power generation from wind and solar plants, thus ensuring the secure and stable operation of the Greek power grid.
