

**SolarInvert Energy Solutions**

# **Guyana-produced solar power generation system**

## Overview

---

The Linden solar farm, expected to be completed by 2026, is poised to serve as a cornerstone of Guyana's Low Carbon Development Strategy (LCDS) 2030, balancing economic growth with environmental responsibility and climate resilience. How much solar energy is available in Guyana?

As at 2018, the total installed capacity for Solar PV in Guyana is 4.63 MW with an estimated annual generation of 7.16 GWh. In Guyana, solar energy is used for several purposes, including drying agricultural produce, irrigation, ICT, and to improve electricity access in rural areas.

How many solar PV farms will Guyana have?

The main electric utility, Guyana Power and Light Inc. (GPL) is preparing plans for 3 utility scale solar PV farms totaling 30 MW for the national grid in the long term, as well as 0.75 MW Solar PV Farm at Wakenaam and a 4 MW Solar PV Farm at Onverwagt in the near future.

Is Guyana a good place to install solar PV?

As a result, most locations across Guyana have excellent solar insolation levels and are ideal for solar PV generation. As at 2018, the total installed capacity for Solar PV in Guyana is 4.63 MW with an estimated annual generation of 7.16 GWh.

How is electricity produced in Guyana?

Most of Guyana's energy must be imported; domestic electricity is produced largely by thermal generation and is available only on the coastal plain and along the lower reaches of the rivers. Hydroelectric potential in Guyana is considerable, especially at Tiger Hill on the Demerara River and Tiboku Falls on the Mazaruni.

What is Guyana's main source of energy?

Guyana is currently dependent on imported petroleum-based fuels as its main

source of energy.

Is the energy sector poised for significant transformation?

However, the Energy sector is poised for significant transformation due to Guyana re-committing itself to the development of its indigenous renewable energy resources and to pursue 100% renewable energy in electricity generation in its Green State Development Strategy.
