High performance energy storage battery customization in Rotterdam the Netherlands

Overview

Where is the Netherlands' largest battery energy storage system located?

Dispatch, a leading Dutch battery developer, is going to construct the Netherlands' largest stand-alone Battery Energy Storage System (BESS). This groundbreaking 45MW/ 90Mh utility-scale BESS will be located in the port area of Dordrecht, on a 6000m² site and will be used for grid stabilization by storing excess energy from renewable sources.

Will dispatch build the Netherlands' largest stand-alone battery energy storage system?

This project marks the first of many aimed at developing up to 3GWh of BESS projects across the Netherlands, Belgium, and Germany over the next seven years. Dispatch, a leading Dutch battery developer, is going to construct the Netherlands' largest stand-alone Battery Energy Storage System (BESS).

Is this the first 4four-hour battery energy storage system in the world?

From ESS News Rotterdam-based S4 Energy has commissioned a 10 MW/40 MWh battery energy storage system (BESS) in Rilland, Netherlands, marking what the company claims is the first 4four-hour duration system of its kind in the country.

Are battery energy storage systems a direct source of flexibility?

An important direct source of flexibility for the electricity market, are battery energy storage systems (BESS). DNV has been commissioned by Invest-NL to examine the Dutch wholesale and balancing market developments and opportunities for BESS.

What is a battery energy storage system (BESS)?

The rise of power generation from weather-dependent renewables, combined with a major shift in demand towards increased electrification, leads to new challenges in continuously balancing demand and supply of electricity. An

important direct source of flexibility for the electricity market, are battery energy storage systems (BESS).

Is the Dutch grid under strain?

The project's 4-hour discharge capability distinguishes it from shorter-duration systems commonly used for frequency regulation. S4 Energy's CCO, Dominique Becker Hoff, stated that the Dutch grid is under strain, citing growing demand and a mismatch between renewable energy availability and demand.
