

## SolarInvert Energy Solutions

# Household Solar Photovoltaic System in Hanoi

## Overview

---

What is the technical potential of rooftop solar power in Hanoi city?

In this paper, the technical potential of rooftop solar power in Hanoi city is evaluated by using high-resolution remote sensing images technology, it can be seen that the total annual installed capacity of rooftop PV power and the PV optimal in Hanoi city are about 13,169.72 MWp and 37,591,481.20 MWh/year, respectively.

Does Hanoi city have solar energy potential?

The solar energy potential in Hanoi city was analyzed. A methodology for assessment of rooftop solar power technical potential has been presented. The total installed capacity and the total generated electricity of rooftop grid-tied solar power system in Hanoi city are calculated.

Is the household rooftop solar power sector a new field in Vietnam?

The household rooftop solar power sector is a new field in Vietnam; however, only the energy or economic efficiency of few individual projects has been evaluated. Furthermore, there is no comparison among the projects in the different regions of Vietnam.

Is solar power a viable option in Vietnam?

Vietnam has great potential to develop renewable energy, including solar energy. However, the development of solar power in Vietnam has been slow, and solar power had not been considered a viable option for power generation until 2015 when the Vietnamese Government issued the strategy for renewable energy development .

How much solar power does Vietnam have?

According to Vietnam Electricity's data, the total installed capacity of commercial PV power projects has reached 4464 MWp by the end of June 2019, solar power accounted for 8.28% of the total installed capacity of

Vietnam's power system [ 9 ]. This capacity scale has far exceeded the expected PV power development target of 850 MWp in 2020 [ 10 ].

How much does rooftop solar power cost in Vietnam?

As stated in the Decision, the selling price of rooftop solar power, 8.38 UScent/kWh, is applied only for the projects installed in 2020 and the later projects have to wait for a new policy issuance . Thanks to the Government's incentive policy, there has been an impressive boom in the installed solar capacity in Vietnam.
