Household solar photovoltaic system in Poland

Test certification

Overview

Why should you invest in photovoltaic panels in Poland?

Photovoltaics, like heat pumps, have become one of the fastest-growing energy sectors in Poland. Investing in photovoltaic panels is not only a way to save money but also to increase independence from rising electricity prices. By generating electricity from renewable energy sources, you can protect the environment while reducing your bills.

What is photovoltaics & how does it work in Poland?

Photovoltaics, i.e. the use of solar energy to produce electricity, is becoming more and more popular in Poland. However, before we explore its current state and prospects, it is worth taking a look at the history of the development of this technology in the country.

Who can apply for a photovoltaic installation in Poland?

The program is dedicated to households in Poland. Only domestic persons generating electricity for their own needs can become beneficiaries. You can apply for the program even if you purchased the installation after February 1, 2020. This means that you can qualify for the costs already incurred for a photovoltaic installation.

What are the prospects for photovoltaics in Poland?

The prospects for photovoltaics are very positive, especially in the commercial sector, which is largely due to the electricity pricing policy. While private households in Poland pay 0.22 euros per kilowatt hour, the electricity price for commercial enterprises is 0.39 euros per kilowatt hour.

Will solar power be a good investment in Poland in 2025?

Thanks to additional government subsidies for small private PV systems and high electricity prices of over 30 eurocents per kilowatt hour for companies, investments in own electricity generation in both areas will become attractive

in 2025. In September 2024 alone, PV systems with a total power of 363.53 megawatts were installed in Poland.

Is photovoltaics a good choice in Poland?

Photovoltaics in Poland is becoming not only an ecological but also an economical choice. The dynamic development of this technology opens up new opportunities for both enterprises and individual consumers. 1. Is installing photovoltaics profitable for me?
