# How many hydrogen energy stations are there in Belmopan

## Overview

---

How many hydrogen refuelling stations are there worldwide?

According to the latest figures from LBST's H2stations.org report, the number of operational hydrogen refuelling stations worldwide has officially crossed the 1,000 mark. Specifically, by the end of 2024, around 1,160 stations were up and running – an impressive milestone for an industry once viewed as the distant future of clean mobility.

How many hydrogen refueling stations are there in Shanghai?

Current State of Hydrogen Infrastructure Presently, Shanghai has developed 10 hydrogen refueling stations and almost 30 kilometers of hydrogen transmission pipelines, with an industrial hydrogen supply capacity nearing 500,000 tons annually. Strategic Development of Hydrogen Refueling Stations.

Which city has the most hydrogen refueling stations in China?

Due to its early start in the hydrogen energy sector, Shanghai is the city with the most hydrogen refueling stations in China, New York-based KPMG said. The metropolis should have 70 such stations by 2025.

What is the International Hydrogen Energy Valley?

The International Hydrogen Energy Valley in Shanghai's Lingang Special Area aims to exceed a 20-billion-yuan scale in the hydrogen fuel cell industry by 2025. It seeks to become a world-class fuel cell vehicle innovation center and an industrial hub supporting Lingang Special Area's pioneering zone for hydrogen energy development.

How many hydrogen stations are there in Europe?

Notably, South Korea added 25 stations – its third consecutive year at that pace – reinforcing its position as a major hydrogen hub. Europe saw its station count rise to 294, with Germany at 113 and France at 65. The Netherlands

reached 25 stations, while Bulgaria and Slovakia each opened their very first stations in their capitals.

How many hydrogen-powered vehicles will China have by 2025?

Hydrogen fuel cell-powered vehicles are one of the major applications of hydrogen energy and China aims to have 50,000 hydrogen-powered vehicles by 2025, according to the National Development and Reform Commission's hydrogen development plan issued in March.
