How many kilowatts of solar panels are there in Slovenia

Overview

Slovenia recorded 400 MW of new PV installations in 2023, taking its total installed capacity to 1.1 GW, according to figures from the Ministry of the Environment, Climate and Energy. How much solar power does Slovenia have in 2024?

According to the Slovenian Photovoltaic Association, Slovenia installed 298.8 MW of solar capacity in 2024. This total includes 191.5 MW from residential systems, 100.8 MW from commercial and industrial projects, and 6.5 MW from municipal installations.

Does Slovenia have a solar energy program?

In January 2025, Slovenia's Ministry of Cohesion and Regional Development launched a 16 million euro program to support solar energy communities with projects of at least 100 kW capacity. This total includes 191.5 MW from residential systems, 100.8 MW from commercial and industrial projects.

Does Slovenia have a solar market?

Slovenia's solar market is experiencing significant growth, with 85 MW of new capacity installed in the first half of 2025, according to PV Magazine. This expansion is driven by the increasing adoption of both residential and commercial and industrial (C&I) solar projects.

How much solar power will Slovenia have by 2030?

In its report, issued a month ago, SolarPower Europe estimated that Slovenia could reach 6.2 GW in total solar power capacity by 2030. Of note, a record 55.9 GW was installed in Europe last year, 40% more than in 2022. The boom in photovoltaics is evident throughout the planet.

Why are solar projects growing in Slovenia?

This expansion is driven by the increasing adoption of both residential and commercial and industrial (C&I) solar projects. The cumulative capacity of

solar installations in Slovenia now stands at 1.2 GW, according to data from the Energy Agency of Slovenia.

Does Slovenia have a reliable electricity grid?

Slovenia boasts a generally reliable electricity grid with a robust transmission network that ensures uninterrupted and high-quality power delivery. However, grid reliability can be impacted during winter periods due to increased energy demand and reduced solar power output. 4 We can help you start your own solar module production company.
