**How many manufacturers are
there for 5g base station
chassis**

Overview

How big is the 5G base station equipment market?

The 5G base station equipment market is estimated to reach US\$52.733 billion by 2030 from US\$29.865 billion in 2025, growing at a CAGR of 12.04%. 5G base stations form the backbone of next-generation wireless networks, enabling enhanced bandwidth, ultra-low latency, and broader coverage to support rising connectivity demands.

Who makes 5G in China?

A paid subscription is required for full access. As of 2023, 58 percent of all 5G base stations in China had been manufactured by Huawei. Its closest competitor was ZTE with a market share of 31 percent. Both telecom manufacturers have maintained a similar market share throughout all bidding rounds since 2020.

Where is the first 5G base station made?

Back in July of last year, Verizon received the first U.S. manufactured 5G base station from a facility in Texas. Pictured is Verizon's CTO Kyle Malady holding some of the hardware. Image used courtesy of Ericsson.

How many 5G base stations does China have?

In November, China claimed that, despite the COVID-19 pandemic, it had built over 700,000 5G base stations in 2020, adding to the 100,000 base stations built in 2019. This means that China as a single country has more base stations than the combined total of every other nation on earth.

What is the future of 5G infrastructure?

Major players include Huawei, Samsung, Nokia, Ericsson, and Cisco. As smart cities, IoT, and mmWave technology expand, the 5G infrastructure market will continue strong growth, shaping the future of high-speed connectivity.

How many people use 5G in China?

With strong government support, the three big companies invested heavily in the construction of the country's 5G network. As a result, China had comprehensive 5G coverage that provided high-speed mobile internet to almost 600 million 5G users . Foreign tech in the Chinese telecom market?
