

## SolarInvert Energy Solutions

# How many watts of solar lights are installed in Ho Chi Minh Vietnam

## Overview

---

How much solar power does Vietnam have?

The lead-up to the expiration of the initial solar feed-in tariff (FIT) of US\$93.5/MWh saw a large increase in Vietnam's installed capacity of solar photovoltaic (PV), from 86 MW in 2018 to about 4.5 GW by the end of June 2019. The number reached about 16.5 GW as of the end of 2020.

How much solar power does Vietnam have in 2020?

The country has hit a record high by doubling rooftop solar capacity to 378 megawatts (MW) by the end of December 2020, up from 378 MW in 2019. According to the IRENA Renewable Energy Statistics 2021, Vietnam's installed solar PV capacity in 2020 was estimated as 16,504 MW, up from 4,898 MW in 2019.

Does Vietnam have a solar energy boom?

Vietnam has recently experienced a tremendous solar photovoltaic (PV) boom, marking the beginning of the country's biggest and most swift energy transition. In 2021, Vietnam's solar energy capacity was roughly 16.6 thousand megawatts, which is hardly compared to the previous year.

What is the cost of solar electricity in Vietnam?

Last year, Vietnam had a solar LCOE (Levelized Cost of Energy) of \$0.046 per kWh for solar electricity. The cost in the United States was \$0.055 per unit of power, and in Turkey it was \$0.064.

Is there a power shortage in Ho Chi Minh city?

Moreover, according to Vietnam's Ministry of Industry and Trade (MOIT), localized power shortages in Ho Chi Minh City's manufacturing hub are expected to begin in 2021. By 2030, the city will be short of 7.5 % of its total capacity, or more than 10,000 megawatts (MW).

Is Vietnam a good country for solar energy?

Vietnam is one of the top ten countries when it comes to installed solar energy capacity, according to the International Renewable Energy Agency (IRENA). The country's aspirational green energy goals have positioned it to become a regional and international leader.
