How much does a solar tile cost to generate electricity

Overview

The average cost of solar panel roof tiles is \$15 to \$35 per square foot, including installation. The cost depends on the brand, the size of the roof, and individual energy requirements. How much do solar roof tiles cost in 2025?

The costs of solar roof tiles in 2025 can vary widely, depending on several factors, such as the size of the installation, the type of tiles used, and the complexity of the roof design. For an average-sized home in the UK, the cost of installing a 4kW solar roof tile system can range from £12,500 to £17,200, including labour.

How much does a solar roof tile system cost?

To give you an idea, the average 3.5 kW solar roof tile system will cost around £13,000, compared to approximately £7,000 for a regular PV system. However, remember that you are also getting a new roof with your solar tiles, so a direct price comparison is slightly misleading. Information last updated in April 2025.

Why are solar tiles more expensive at wholesale?

Solar tiles are themselves more expensive at wholesale. Solar tiles are much more involved in terms of labour time and costs e.g. installing individual tiles vs placing panels on top of the existing roof. The market is less competitive than for traditional solar panels.

Are solar roof tiles efficient?

Unlike traditional solar panels, which are often bulky and visually intrusive, solar roof tiles offer a more integrated solution that doesn't sacrifice aesthetics for functionality. However, several factors can affect the efficiency of solar roof tiles, including shading, roof orientation, and overall solar exposure.

How do solar roof tiles generate electricity?

Solar roof tiles generate electricity using photovoltaic (PV) cells embedded within each tile. These cells capture sunlight and convert it into direct current (DC) electricity. This DC electricity is then converted into alternating current (AC) by an inverter, making it usable for your home's electrical needs.

Can solar tiles be used on existing roofs?

However, it's important to note that in most cases solar tiles are not used for existing roofs and are typically only used for new build properties or when an existing roof is being replaced. How much do solar roof tiles cost in the UK?

As mentioned, on average solar tiles are more expensive than solar panels.
