How much does it cost to convert a solar power system

Overview

Although the national average spent on solar power is around \$18,000 before incentives and rebates, and most pay between \$15,000 and \$25,000 for a 6kW system. How much does a new solar system cost?

The amount that you'll pay for a new solar power installation varies based on the size of the system, which depends on the desired goal. Although the national average spent on solar power is around \$18,000 before incentives and rebates, and most pay between \$15,000 and \$25,000 for a 6kW system.

How much does a solar panel installation cost?

Expect to spend between \$1,000 to \$2,000 depending on system size. The average cost of solar panel installation in the U.S. usually ranges from \$10,000 to \$25,000 before applying any incentives or rebates. Factors that impact this cost include panel type, roof structure, local labor rates, and permit fees.

How much does solar power cost?

Although the national average spent on solar power is around \$18,000 before incentives and rebates, and most pay between \$15,000 and \$25,000 for a 6kW system. Some homeowners start with a smaller system to power their air conditioner, range, or clothes dryer, since these appliances use a great deal of electricity.

How much does a solar inverter cost?

Inverter: A solar inverter converts the generated DC electricity into AC electricity that can be used to power your home. The cost of an inverter depends on its size and efficiency, but these devices typically cost between \$1,000 and \$3,000. **Mounting system:** This is what holds rooftop solar panels in place.

How much does a solar system save on energy costs?

On average, homeowners with a complete solar system save \$41,000 to \$62,000 on total avoided energy costs over 25 years. It all depends on what your local utility charges for electricity, according to Robert Flores, a solar expert at The University of California, Irvine's Clean Energy Institute.

How much does solar power cost in 2025?

Take control of your energy costs with solar power. Solar panels generate "free" electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025.
