# How much does it cost to customize an outdoor wind power base station in Papua New Guinea

## Overview

---

How much does it cost to build a wind turbine power plant?

Discover the price range for building a wind turbine power plant, from \$2.5 to \$4 million per turbine, and unravel the key factors influencing these costs. To build a wind turbine power plant, it can cost you between \$2.5 to \$4 million per turbine. The total investment varies based on factors like location, size, and specific project needs.

How much does an offshore wind turbine cost?

Large offshore turbines can cost tens of millions of dollars, with the most powerful 12 MW turbines reaching up to \$400 million ( $\approx 12820.5$  years of non-stop work at \$15/hour - exceeding the time since the end of the last Ice Age) for manufacturing and installation.

How much does a commercial wind turbine cost?

How much do commercial wind turbines cost?

A utility-scale wind turbine costs between \$1.3 million to \$2.2 million per MW of installed nameplate capacity. Most commercial-scale turbines installed nowadays are 2 MW in capacity and cost between \$3 and \$4 million to install.

How much does wind turbine maintenance cost?

Wind turbine maintenance expenses can have a significant impact on the overall operational costs of wind power plants. Annual maintenance costs typically range from \$42,000 to \$48,000. These expenses, which can increase as turbines age, usually amount to 1-2 cents per kilowatt-hour produced.

How much does an onshore wind project cost?

After factoring in construction costs for foundations, access roads, cabling, grid connections, permitting, and installation labor, the total installed cost per megawatt rises to between \$3 million and \$4 million ( $\approx 128.2$  years of non-

stop labor earning \$15/hour) for a completed utility-scale onshore wind project.

How much does a 12 MW wind turbine cost?

The most powerful 12 MW wind turbine costs up to \$400 million to manufacture and install. Costs for utility-scale wind turbines can be broken down into three categories: manufacturing, transport and installation, and operations and maintenance.
