Overview

How much does a solar project cost in Vietnam?

Vietnam's Ministry of Industry and Trade (MIOT) recently introduced new ceiling prices for solar and wind projects that sell electricity to Electricity of Vietnam (EVN). The ceiling price for ground-mounted solar has been slashed from \$0.0709/kWh to \$0.0502/kWh, threatening the financial viability of large-scale solar projects.

How much does a ground-mounted solar project cost in Vietnam?

The ceiling price for ground-mounted solar has been slashed from \$0.0709/kWh to \$0.0502/kWh, threatening the financial viability of large-scale solar projects. Vietnam's Ministry of Industry and Trade (MIOT) has set new price ceilings for the so-called "transitional" wind and solar projects.

Can EVN negotiate new solar and wind energy tariffs in Vietnam?

On 7 January 2023, the Vietnam Ministry of Industry and Trade announced new ceiling prices for solar and wind energy in the country, pursuant to which Vietnam Electricity (" EVN ") can now negotiate tariffs in relation to transitional solar and wind energy projects in accordance with Circular 15/2022/TT-BCT (" Circular 15 ").

Does Vietnam have a solar power industry?

Vietnam's solar power industry has grown rapidly since 2017, driven by generous feed-in tariffs and strong government support. The country now has one of the highest installed solar capacities in Southeast Asia, contributing significantly to its renewable energy goals.

2. What challenges is Vietnam's solar power sector facing?

.

Is Vietnam a good place for solar energy?

Abundant sunshine makes it an attractive location for solar, particularly in the south, with potential estimated at 12–15 GW. The average annual solar energy received on a horizontal surface in Vietnam varies between approximately 1200 and 2000 kWh/m². Vietnamese power production by fuel type, 2013–2022.

Why does Vietnam have a high solar capacity?

The introduction of attractive feed-in tariffs in 2017 spurred a surge in solar installations, leading to a dramatic increase in capacity and investment. As a result, Vietnam now boasts one of the highest installed solar capacities in the region, contributing to its goal of transitioning to a more sustainable energy mix.
