# How much does outdoor power supply cost in Finland

## Overview

---

How much does electricity cost in Finland?

The residential electricity price in Finland is EUR 0.165 per kWh or USD 0.172. The electricity price for businesses is EUR 0.109 kWh or USD 0.114. These retail prices were collected in June 2024 and include the cost of power, distribution and transmission, and all taxes and fees. Compare Finland with 150 other countries.

How does supply and demand affect electricity prices in Finland?

When supply and demand bids meet, it creates the market price or so-called spot price for electricity, which varies hourly based on supply and demand. Consumers in Finland can shop around for lower electrical energy rates, which make up about a third of the electricity bill.

Why should Finland increase electricity consumption?

Increasing electricity consumption will provide Finland a competitive edge due to the country's sustainable electricity production and supply security. The price of electricity is set in a power exchange where electricity producers and suppliers place their bids based on forecasts.

What is the lowest spot price in Finland?

Lowest spot price today is 0 ct/kWh in area FI1. Highest is 2 ct/kWh in area FI1. How much does it cost right now?

Detailed spot price on electricity hour by hour in Finland today. Check how much it cost to use electrical appliances with the current electricity prices in Finland.

Is Finland a net exporter of electricity?

Last year, Finland became a net exporter of electricity on a weekly basis for the first time. The share of net imports dropped to 2.2 percent of Finland's

electricity consumption. The improved production situation also meant that spot prices in Finland were more frequently the same as in Northern or Central Sweden compared to the previous year.

What is the primary source of electricity in Finland?

The primary source of electricity in Finland is nuclear power, which plays a pivotal role in the nation's energy strategy. Nuclear energy offers a reliable and low-carbon source of electricity, aligning with Finland's commitment to environmental responsibility and greenhouse gas reduction.
