How much is the export tariff for Havana energy storage cabinets

Overview

Will US tariffs affect energy storage?

There have also been indications that the US administration may consider other tariff proposals impacting energy storage, such as a 10–20% universal tariff, tariffs of up to 60% across the board on Chinese-origin goods, and tariffs of 25% on Mexican and Canadian origin goods.

Which international trade issues will remain a concern for energy storage projects?

Two major areas of international trade that will remain causes of concern for energy storage projects are the application of tariffs and supply chain integrity.

Did Trump impose a tariff on Mexico and Canada?

With the tariffs imposed on February 1, 2025, President Trump was the first president to utilize the International Emergency Economic Powers Act (IEEPA) to impose a 25% tariff on goods from Mexico and Canada (other than a lower 10% tariff on Canadian energy and energy resources) and an additional 10% tariff on goods from China.

How does tariff risk affect a battery energy storage system (BESS) project?

Mitigating tariff risk in battery energy storage system (BESS) projects is crucial for ensuring project financial viability, as tariff changes can significantly affect cost structures and overall project economics.

Will China impose tariffs on lithium-ion EV batteries?

An interesting issue will be the imposition of tariffs. There are existing tariffs pursuant to Section 301 of the Trade Act of 1974 on some Chinese-origin lithium-ion EV batteries and non-lithium-ion battery parts, which were increased to 25% in September 2024.

Which countries import during Q3 2023?

Germany and Hungary import during Q3 2023. (Refer to the 2169.9 KB English document from May 30, 2023 for Hungary's details.) Republic of Ireland also imports during this period. (Refer to the 2129.9 KB English document from May 30, 2023 for more information.)
