

## SolarInvert Energy Solutions

# How to thread the battery cabinet to the ESS power base station

## Overview

---

### How to connect ESS battery?

Make sure that all terminals are tightened to 2.5 Nm, use a torque wrench. Remove the cable grommet for the RJ45 cable, poke a hole, cut it open along one side and attach it around the communication cable. The ESS Battery is now connected!.

### How should the ESS power case be positioned?

Make sure that the ESS Power Case and the ESS Battery are positioned close enough for the premade battery cables to reach. Indoor environment protected from rain and direct sunlight. Ambient temperatures must not fall below 0 °C and not exceed 45 °C. The environment must be non-condensing, relative humidity below 95%.

### Where can I find the installation instructions for my ESS power case?

PN: PD10008, Rev: A01, Copyright Ferroamp Elektronik AB 2022. Document subject to change without prior notice. Verify that you have the latest version of this manual on our website. In this booklet you will find installation instructions for your ESS Power Case.

### How does ESS recharge a battery?

- Recharge: ESS will recharge the battery to the minimum SoC limit if it drops more than 5% below the minimum configured SoC. Once the minimum SoC is reached the system once again switches to Discharge disabled.

4.3.11. Limit inverter power Limit the power drawn by the Multi: ie. limit the power being inverted from DC to AC.

### How do I use ESS battery life?

- Connect to AC when available, keep batteries charged: Use ESS Assistant and select the "Keep batteries charged" mode. Make use of 'off-peak tariffs' • Not available in the ESS System yet, but it will be implemented. Winter mode

- The ESS BatteryLife feature will make sure that the batteries are not unnecessarily cycled around a low SoC.

How do I calibrate the ESS battery?

Turn on the EnergyHub. Close the breaker on the ESS Power Case. Close the breaker on the ESS Battery and press the start button for 5 seconds until it rings. When the system is on the battery will calibrate during the first 24 hours. During this time, you should set the charge reference to 1 kW in the system configuration ().
