# How to use Huawei indoor base station power cabinet

## Overview

---

How much power does a Huawei base station use?

APM30+ RFC +TMC+BB,DRFU (S444)/ GRFU (S121212): 4-hour standby (184Ah) Description: The power consumption of the transmission cabinet is less than 200W. Huawei's fourth-generation base station includes: indoor macro base station BTS3900, outdoor macro base station BTS3900A, distributed base station DBS3900.

Why are Huawei cabinets installed in a row?

The cabinets are installed in a row in the same equipment room for easy cabling. The total number does not tally with the Find out the cause and report any missing packing list articles to the local Huawei office. Step 2 Check the exterior of the packing case. Issue 07 (2013-11-08) Huawei Proprietary and Confidential.

How many RF modules are in a base station cabinet?

The base station cabinet contains as many as six RF modules. These multicarrier modules support both Huawei's GSM-R 5.0 and the company's enterprise LTE (eLTE). Use of this multi-radio base station (and similar indoor base stations) maximizes versatility while minimizing site deployment costs.

Can bbu3900 be installed inside a power cabinet?

RFUs. If a 110 V AC or 220 V AC power supply is applied, an APM30H or APM30H (Ver.C) power cabinet is used and the BBU3900 can be installed inside the power cabinet. If a -48 V DC power supply is applied, a TMC11H or TMC11H (Ver.C) transmission cabinet is used and the BBU3900 can be installed inside the transmission cabinet.

What is a 3900 base station?

With this aim in mind, Huawei developed 3900 series base stations, which are designed based on a high-performance platform and use an optimized

hardware and software architecture. These base stations can work in multi-mode due to their cutting-edge modular design. They also have broad bandwidth and are eco-friendly and easily upgradeable.

What is a bbu3900 base station?

The 3900 series base stations allow a macro base station and a distributed base station to be deployed at the same site. In this scenario, the RFUs and RRUs are connected to the same BBU3900. This deployment provides flexible networking of base stations, enabling further capacity expansion and evolution in the future. BBU.
