

SolarInvert Energy Solutions

Huawei Singapore Container Energy Storage

Overview

What are Huawei energy storage technologies?

Huawei's energy storage technologies extend battery life, ensure safe operation and simplify maintenance and servicing (O&M) through precise management of battery cells, packs and racks, accurate control of charging and discharging, and innovative Smart String ESS technology.

What is Huawei luna2000-2.0mwh-2h1 HC-container?

With the installation of the Huawei LUNA2000-2.0MWH-2H1 in a 20' HC-container, Huawei offers the optimal large-scale storage solution. The ESS is a prefabricated all-in-one energy storage system with a modular structure, integrated power supply and distribution cabling, monitoring functions, environmental sensors and fire protection measures.

How does Huawei smart string ESS work?

Battery pack failures are detected in real time and data is transmitted to the Huawei SmartPV Management System, which issues effective warnings in the event of problems in the ESS. Within the Smart String ESS, faulty packs and racks are isolated and disconnected, and the entire system can be safely shut down if thermal runaway is detected.

Can Huawei's smart string inverter help EDPR APAC's offshore floating PV farm?

Huawei's smart string inverter solution was also deployed to support EDPR APAC's offshore floating Photovoltaic (PV) farm (a 5 MW-peak system, which is one of the world's largest offshore floating PV system) off the north coast of Singapore on the Straits of Johor, using technology to generate clean energy in corrosive, saline conditions.

What is the luna2000-2.0mwh-2h1 smart string energy storage system?

The LUNA2000-2.0MWH-2H1 Smart String Energy Storage System, with a C-

rate of ≤ 0.5 , can control the charging and discharging of the DC rectified by the Smart PCS for grid peak load reduction and frequency regulation in two hours from the battery packs.

What is Huawei luna2000-2.0mwh-2h1 battery storage system?

The Huawei LUNA2000-2.0MWH-2H1 battery storage system sets new standards with a fixed capacity of 2.0 MWh and enables full charging and discharging of up to 2 MW in two hours.
