

## SolarInvert Energy Solutions

# Huawei s outdoor power supply factory

## Overview

---

What is a Huawei outdoor power system?

Huawei outdoor power solutions are designed for carrier ICT sites. The all-in-one system supports multiple input (grid/PV/genset) and output (12/24/48/57 V DC, 24/36/220 V AC) modes. One cabinet is able to suit current needs and expand as required by ICT convergence and network evolution.

What are Huawei power products?

Power products include systems for indoor, outdoor, embedded, and Central Office (CO) applications. They include Distribution Power Systems (DPS) and hybrid power, as well as a site energy management system. Huawei telecom power products adapt easily to a variety of telecommunication networks.

Where is Huawei isupersite located?

The outdoor blade power + PV site jointly built by China Tower Zhejiang and Huawei is deployed in Hangzhou. Huawei's iSuperSite showcase, a joint venture with China Mobile Hangzhou and the China Mobile Design Institute in Hangzhou, is located in Herui International Science and Technology Plaza in Hangzhou High-tech Development Zone (Binjiang).

Why does Huawei need a new R&D center?

Huawei needs to strengthen its research and development, especially as it bore the brunt of America's sanctions in the ongoing chip war between Beijing and Washington. By combining many of its R&D centers into one monolith, the company could streamline its operations and make collaboration between different departments much easier.

How does Huawei use AI based technology?

Huawei adopts AI-based technologies to realize intelligent scheduling of energy sources such as the grid, genset, and solar power, providing reliable power supply in areas with no or unstable grid power, maximizing energy

efficiency, and promoting green and sustainable development.

How much does Huawei cost in China?

EE Times China (via machine translation) says this sprawling facility costs over 10 billion Yuan (almost \$1.4 billion) and covers 2,600 acres. The company also constructed over 40,000 offices, which is expected to house 35,000 Huawei personnel.
