

SolarInvert Energy Solutions

Hungary Pecs Power Generation and Energy Storage Project

Overview

Where will Hungary's largest energy storage system be built?

With funds obtained through a previous program, transmission system operator MAVIR is already building the country's largest energy storage system – a 20 MW project in Szolnok, central Hungary, the ministry said. It added that several projects with even bigger capacity will be installed under the tender concluded a few days ago.

Will Hungarian energy storage projects get subsidy support?

The Hungarian Ministry of Energy has announced that around 50 grid-scale energy storage projects with a cumulative capacity of 440 MW have received subsidy support through a tender launched in February this year.

How will the Hungarian government support residential PV in 2024?

In 2024, the Hungarian government continues to support the growth of residential PV through its newly launched Napenergia Plusz Program, a grant scheme for the installation of modern solar panel and storage systems with a total budget of HUF 75.8 billion. The scheme is expected to support over 15,000 households.

How much solar capacity does Hungary need?

Hungary has set a target of 12 GW of solar capacity by the start of the next decade. However, grid capacity shortfalls have been dire, hampering primarily the rollout of large-scale solar. The country's revised National Energy and Climate Plan envisages the construction of a total of 1 GW of storage capacity by 2030.

Does Hungary have an Energy sector?

Energy sector in Hungary, excluding financial institutions, and allows for cross-border participation. While all storage technologies are eligible, the Hungarian authorities, upon notifying the measure to the Commission, anticipated that

the majority of proposals would invol
