

## SolarInvert Energy Solutions

# Industrial and commercial energy storage cabinet charging and discharging test equipment

## Overview

---

What are commercial energy storage products?

High-quality commercial energy storage products can achieve real-time monitoring of remaining capacity and load size of power lines with the support of energy management systems, and can interact with energy units such as distributed photovoltaics and charging equipment.

What are the applications of energy storage system?

The energy storage system can achieve applications such as solar energy storage integration, energy transfer, primary frequency regulation, secondary frequency regulation, reactive power support, short-circuit capacity, black start, virtual inertia, damping, etc. in conjunction with photovoltaic power generation.

Who is Tu Energy Storage Technology (Shanghai)?

Safe operation and system performance optimization. TU Energy Storage Technology (Shanghai) Co., Ltd., founded in 2017, is a high-tech enterprise specializing in the research and development, production and sales of energy storage battery management systems (BMS) and photovoltaic inverters.

What is a shared energy storage power station?

This project is the first shared electrochemical energy storage power station of SVOLT, with a rated total installed capacity of 50MW/100MWh for the energy storage system. Shared energy storage can reduce the investment cost of new energy projects, play a role in power regulation, and promote the matching of power supply and demand.

Can ul test my energy storage system based on ul 9540?

Let's collect some information so we can connect you with the right person. UL can test your large energy storage systems (ESS) based on UL 9540 and provide ESS certification to help identify the safety and performance of your

system.

Which energy storage series products have full-stack coverage?

The energy storage series products of SVOLT achieved full-category coverage, providing a full-stack solution for cells, PACK, systems, and intelligent applications. Advanced staking process is adopted for SVOLT products and all series products have undergone penetration test to ensure safety.
