

## SolarInvert Energy Solutions

# Installation of Huawei communication base station inverter work

## Overview

---

How to set up fusion solar inverter?

Install the Dongle. Ensure that the AC and DC sides of the inverter are powered on before setting parameters. 3. Install the FusionSolar app. Perform the Setup wizard operations. If you have performed such operations, skip this step. If not, you can scan the QR code below to obtain the app quick guide which describes the Setup wizard operations.

Are electricians allowed to install Huawei products?

They are only supplements to the safety instructions. Only certified electricians are allowed to install, connect cables for, commission, maintain, and troubleshoot Huawei products, and they must understand basic safety precautions to avoid hazards.

Can fusion solar inverter be connected to a WiFi network?

If the inverter is connected to the FusionSolar app over its built-in WiFi network, only local commissioning can be performed. Power grid types supported by the SUN2000 include TN-S, TN-C, TN-C-S, TT, and IT. Figure 2-3 Supported power grids In an IT power grid, you need to set Isolation settings to Input not grounded, with a transformer.

How to install AC input power cables?

Partially tighten the nuts of the AC input power cables to a torque of 5 N·m when securing the cables. The wiring terminal must be installed with heat-shrink tubing at the crimping area of the cable conductor. Ensure that the electrical clearance between the conductors is greater than 20 mm.

How to connect a PCs to an inverter?

Step 1 Connect the AC input power cables. It is recommended that the socket length be greater than 45 mm. (Mandatory) MCCB cabling principle: The inverter and PCS are connected to the same MCCB and to the copper bar in

back-to-back mode. The inverter is connected to the outer side of the copper bar, while the PCS to the inner side.

How does the inverter detect the connection mode of PV strings?

The inverter can automatically detect the connection mode of the PV strings. When the PV strings connect to one another in parallel outside the inverter and then connect to the inverter independently (fully parallel connection), set this parameter to All PV strings connected.
