

SolarInvert Energy Solutions

Inverter 60KW power generation per hour

Overview

What is a 60 kW solar inverter?

Designed to support a power of 60 kW, this equipment is ideal for large-scale photovoltaic installations, whether commercial or industrial. The main features of the inverter include 4 MPPTs that allow flexible adaptation to various solar panel layouts, thus maximizing solar energy capture regardless of installation conditions.

Is a 6 kW inverter worth it?

The combination of these two things means that it's probably not worth your while having a system at 6 kW. A 5 kW inverter will be the most cost effective. And the extra 1 kW of panels means that you'll get best use out of your inverter - it will spend more time running at its peak output.

What is the best solar inverter?

With max. 15A DC input current per string, the SMT 50-60kW Series is compatible with different types of high-power modules, which ensures more solar power absorption making it one of the most productive inverters on the market. Up to 6 MPP trackers guarantee optimal energy production even in shade.

Why should you choose a MPPT inverter?

With a wide operating voltage range and a low start-up voltage for the MPPT, the inverters ensure extended operational hours and increased power generation. They also support advanced functions such as shadow scanning and remote operation and maintenance, which are designed to maximize the long-term benefits for end-users.

What is a SMT 50-60kw solar inverter?

SMT 50-60kW Series is a pioneering inverter for your business and value. 200V-950V wide input operating voltage range allows the solar system to start

at an early stage, fully utilizing the daytime to maximizing solar powered energy generation. The fuse-free design without consumable parts significantly reduces the operating time and costs.

What is a goodwe SMT 50-60 kW inverter?

GoodWe SMT 50-60kW Series inverter is ideal for medium and large-scale commercial installations. Harvest solar energy and generate environmental-friendly power for increased return on investment brought by high yields with your commercial PV system.
