

## SolarInvert Energy Solutions

# Inverter three-phase AC220V

## Overview

---

What is DC to AC 380V 3 phase inverter?

These dc to ac 380v 3 phase inverter are available in distinct voltage capacities such as 230VAC, 220V/230V/240V for converters, and 100V/110V/120V/220V/230V/240V for the inverter product line. These dc to ac 380v 3 phase inverter are also equipped with input reverse polarity protection features too.

What is a 220 kW 300 hp variable frequency drive inverter?

220 kW 300 hp variable frequency drive inverter, input voltage three phase 220V, 415V, 460V AC for selection, tracking motor speed in real time to protect the motor from impact. Output frequency 0~1000Hz and speed regulation 1:100. Come with force cooling fan, 3 phase inverter has good heat dissipation function to protect internal parts.

What is a 3 phase inverter?

With an IP 20 protection rating, three phase inverter can limit running current automatically to avoid frequent over-current which will cause trips. 220 kW variable frequency drive inverter renewable energy systems, industrial motor drives, HVAC systems electric vehicles (EVs), and uninterruptible power supplies (UPS).

How to control a 220 kW frequency inverter?

The multiple-function keyboard of 300 hp frequency drive inverters can control the operation of the 220 kW inverter, such as start, stop, and acceleration. The customer can press the buttons to make the 3 phase inverter work according to set the variable frequency inverter parameters or control the frequency inverter machine's operating speed.

What is the electronic screen of the 220 kW frequency inverter?

The electronic screen of the 220 kW frequency inverter is a key component in

the 3 phase variable frequency drive control system, providing users with an intuitive and real-time information display.

What is a 300 hp inverter used for?

Speed regulation up to 1:100 and input frequency reaches 50Hz or 60Hz. 300 hp inverter is widely used for industrial motor drives, renewable energy systems, UPS, EVs, etc. 220 kW 300 hp variable frequency drive inverter, input voltage three phase 220V, 415V, 460V AC for selection, tracking motor speed in real time to protect the motor from impact.
