Investment in energy storage batteries

Overview

Why should you invest in battery storage?

The battery storage sector stands at the nexus of global energy transition, presenting a compelling investment opportunity driven by an accelerating shift to renewables, surging electricity demand from new industrial loads, and supportive policy frameworks worldwide.

Why is PE investment in battery energy storage growing?

PE investment in battery energy storage systems is surging, fueled by their high return potential and growing energy transition demands. PitchBook data shows that PE investments in energy storage and infrastructure have more than doubled since 2014, reaching \$21.1 billion in 2024 alone.

Is battery storage a fundamental part of energy infrastructure?

“Battery storage is now viewed as a fundamental part of energy infrastructure, much like LNG terminals and oil tankers,” said Gresham House infrastructure and energy transition investor Lefteris Stakosias. Stakosias said this investment boom reflects a broader shift in the global energy market toward renewables.

Why is battery energy storage important?

At the heart of this transition lies battery energy storage, an indispensable technology for ensuring grid stability, reliability, and the efficient integration of intermittent power generation from sources like solar and wind.

How big will a battery energy storage system be in 2024?

After record growth in 2024, U.S. battery energy storage systems (BESS) could grow from more than 26 gigawatts (GW) of capacity—enough to power 20 million homes—to anywhere from 120 GW to 150 GW by the end of 2030, depending on the range of projections.

What makes a battery investment a success?

Success requires understanding the dynamic interaction of regional variations, electricity market design, technology and financing — as well as an acceptance of volatility. To help cut through the complexity, EY teams have identified and ranked the attractiveness of the world's top global battery investment markets for the first time.
